

MENTAL HEALTH RIGHTS MANUAL ALERT

The online Mental Health Rights Manual 2004 is currently under review. An updated version will be available in 2009. In the interim, we alert readers in the Chapter Alerts to items which may now be incorrect due to legislative amendment, or where current law is under government review, although the legislation is still operational.

Similarly under Rights, Principles and Standards there are amendments under review and new key directives and initiatives in place. The process of reform in all aspects of policy and law making is very fluid, and some material in the Manual may not be entirely accurate at any one time. Nevertheless, we have endeavoured to point readers to alternative sources for the most up to date information.

MHCC apologise for any error not identified in this **ALERT**.
